About Aluminox	23

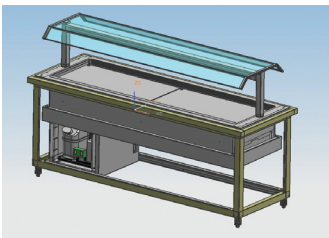

Overview of Aluminox Buffet Lines

Aluminox manufactures high quality Food Serving Buffet Solutions made of 100% stainless steel components utilizing the latest and traditional technologies for food heating and refrigeration. The innovative and elegant design, functionality, scalability and durability of our buffet products are the perfect match to the needs of Hotels, Banquet and Catering Halls, Restaurants and Cafes. Aluminox supplies the global market of Buffet food service with the following product lines:

DROP-IN UNITS

For clients seeking to combine top quality Buffet mechanism with the flexibility of local design, frame construction, decoration and fitting service.

DROP-IN UNITS WITH FRAME

For clients seeking to combine top quality Buffet mechanism and durable Stainless Steel Framing with the flexibility of local design, decoration and fitting service.

BUFFET STATIONS

For clients seeking plug and serve top line food service Buffet Stations with innovative design. Consult with our local representative or food service architect, combine any of the 3 available models (ST, VE or SV) with the decorative material of your choice with the available accessories and we'll deliver a Buffet Station that will distinguish and add to the character of your food serving facility.

Aluminox provides a full series of Heated and Refrigerated Drop-in Units for Buffet Station construction.

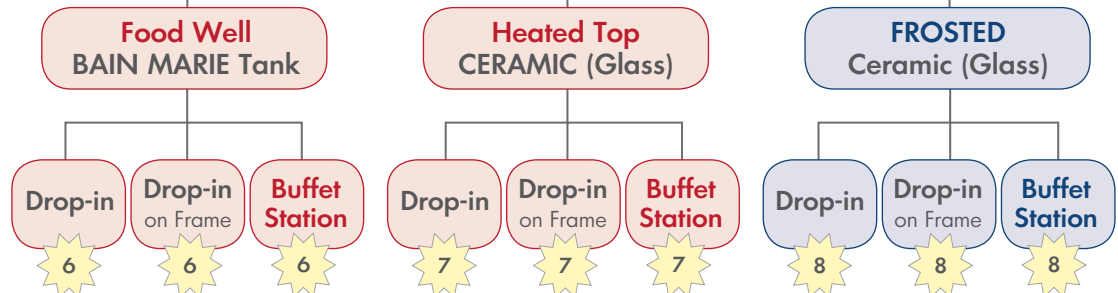

(to identify our product that addresses your need, please refer to sections: Food Serving Buffet Navigator for quick reference to available types and sizes, as well as to Food Serving Buffet Spec Sheets for individual product specifications)

Cooking Stations

Aluminox Cooking Stations go one step beyond food serving. They combine show-cooking and food serving into one attractive integrated solution that create a unique and distinguishing environment in our customer dining establishments. Their elegant design combines effective functionality lay-out for the show-cooking chef as well as a consumer welcoming lay-out and food serving functionality.

Our CFSE Architects consult and design the right Cooking Station for individual client needs and requirements and our production engineers manufacture and deliver some of the finest cooking stations available. An Aluminox cooking stations integrates the entire range of Aluminox Commercial Food Service Equipment (CFSE) as well as, on client's request, selective high quality OEM CFSE equipment from world leading CFSE manufacturers.

All the metallic parts of the cooking station are made of stainless steel, feature the latest and traditional technologies and combined attractive decorative material, food warming and lighting elements. The innovative and elegant design, functionality, scalability and durability our buffet products are the perfect match to the needs of Hotels, Banquet and Catering Halls, Restaurants and Cafes.
